Hire Right

Reduce screening time by 70% without missing top talent

Hiring is broken

Companies receive hundreds of resumes per role, but lack the time and HR bandwidth to screen them effectively.

- 200–500 resumes per job opening
- Manual screening causes decision fatigue
- Great candidates are missed or replied to too late

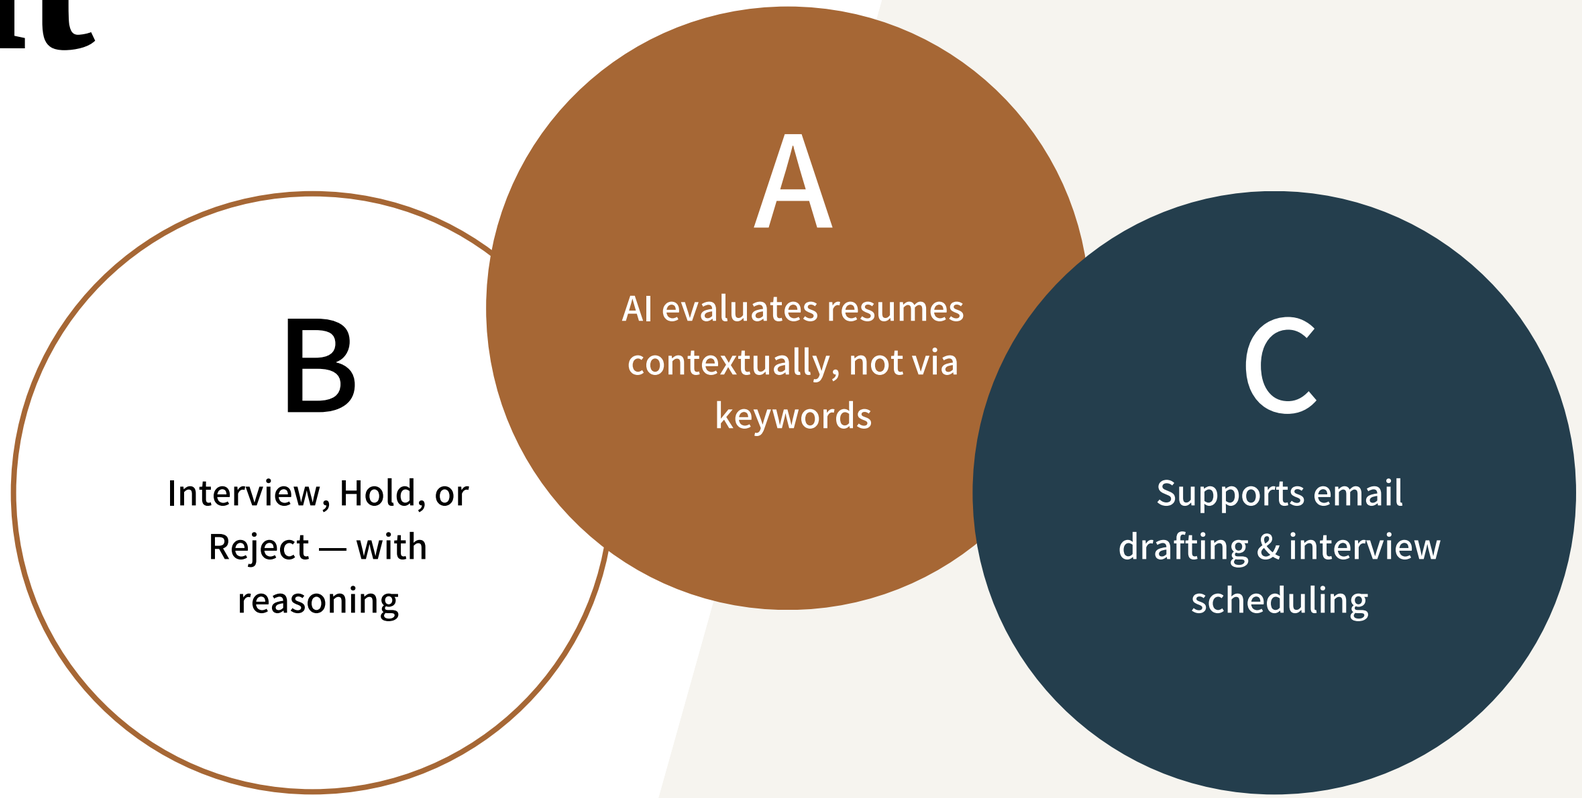
Underserved hiring market

$30B

Global Market

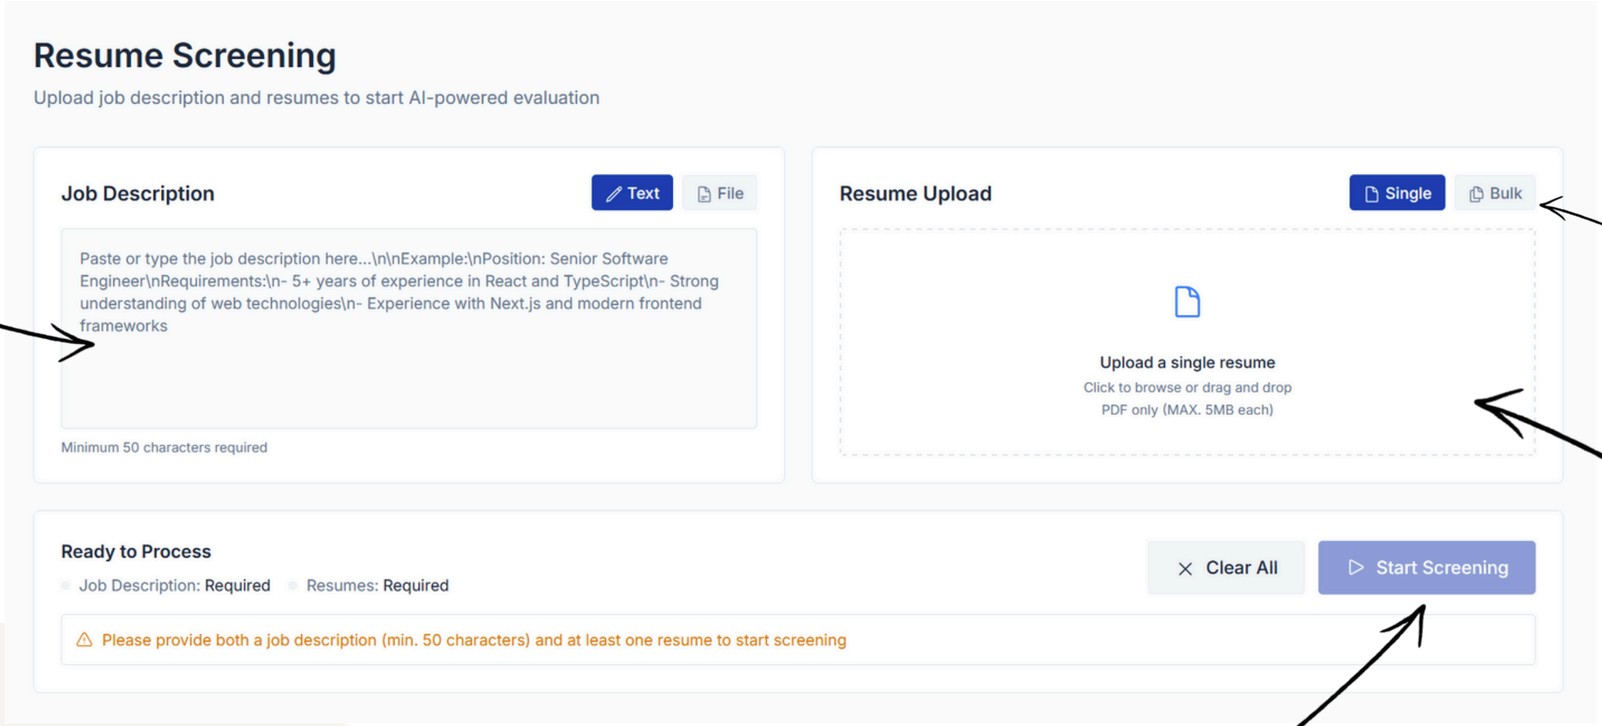
- SMBs make up the fastest-growing segment
- Most tools are built for enterprise HR teams
- Hiring volume is increasing, but HR headcount is not

HireRight focuses on what matters most



How HireRight works

Add Job Description



Analyze Single Or Multiple Resumes

Upload Candidate Resumes

Analyze and get results

Agentic AI architecture

1 Frontend UI collects JD & resume

2 Backend sends data to n8n agent

3 AI agent evaluates candidate

4 Structured result returned to UI

Roadmap & growth plan

A — 0–6 Months

- Resume screening MVP
- Email & calendar integration
- SMB early adopters

B — 6–18 Months

- Multi-role hiring
- ATS integrations
- Team dashboards

C — Long Term

- Hiring analytics
- Candidate quality insights
- Expansion to enterprise-lite segment

How we measure success

Time to Screen

Average resume screening time reduced per role.

Manual Review Volume

Number of resumes reviewed manually reduced.

Candidate Response Time

Time to first candidate response.

Decision Consistency

Recruiters confidence and screening outcomes.

Thank You
